

Dear Amcolians, السلام عليكم

This is to apprise you that Amcolians Alumni Association (AAA) is actively taking its charter of research & skill development ahead. In this context we feel proud to announce the 14th Annual Scientific Symposium & 12th MBBS Reunion - 2018 on 13th to 14th April 2018. This will be preceded by a series of workshops from 15th March to 12th April 2018.

The Organizing Committee is making every endeavor to ensure maximum participation of Amcolians for learning. The theme of this year's scientific symposium is "Triple burden of disease: Challenges, Prospects and Solutions". It is a holistic concept and encompasses the burden of communicable and non-communicable diseases along with trauma and disasters. Impact of the triple burden of disease is often enormous for low- and middle-income countries especially Pakistan. The burden also places mammoth strains on the health system of a country, especially in a resource constrained setting. This symposium is expected to engender productive scientific discussion highlighted by lectures / talks on various facets of this burden on the concerned medical specialists, and can hopefully come up with worthwhile recommendations for policy makers, clinicians and health care administrators to tackle this challenging situation in a manner commensurate with gravity and scale of the problem.

We would also be delighted to present the academic achievements of Amcolians in various specialties/disciplines of health care, and there would be a get together of Amcolians from all over the country and abroad at the Gala Night, with silver jubilee of 12th MBBS.

Please find enclosed tentative events schedule, as well as membership, registration form and abstract forms. Kindly return the completed forms to confirm your participation. There is no registration fee for the symposium for the AAA members. However, non-members have to apply for AAA membership before they are registered for this occasion.

Please feel free to contact us or the registration/coordination office for the queries/suggestions.

Eagerly waiting for you to join us.

Prof. Shakeel Ahmed Mirza
President
Amcolians Alumni Association

Maj Gen Irfan Ali Sheikh TI(M)
Chairman Organizing Committee
